

Mind	Thought	Intelligence	Truth
Soul	Emotion	Care	Love
Body	Action	Courage	Freedom

Body, mind and soul is what it is all about. The strength of the mind is intelligence, the strength of the soul is care and the strength of the body is courage.

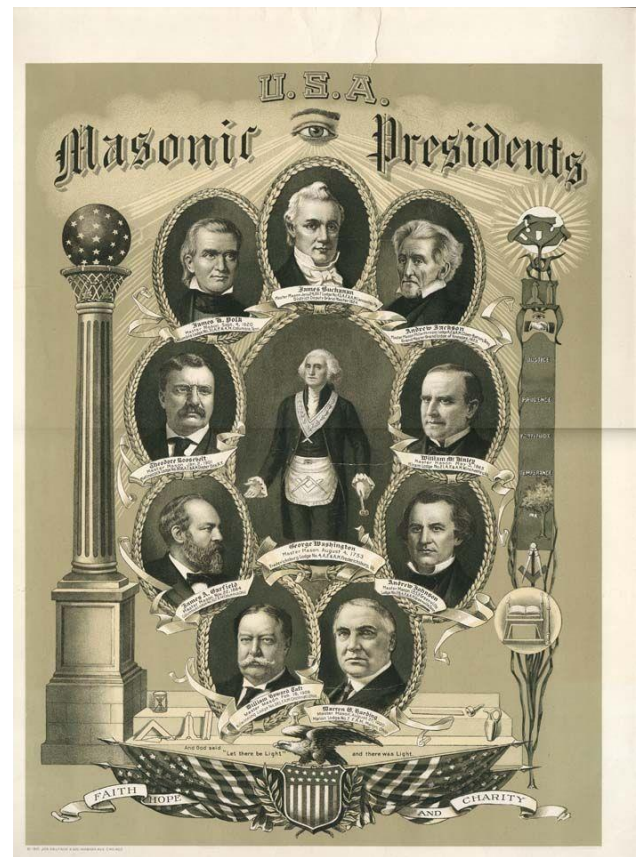

The more intelligence and courage you have, the more will you achieve. Love and care makes you pursue what is best for all. In the absence of love and care intelligence and courage is used for pursuing the will of the ego.

Those who love do not desire to control others. Only fear wants control, love wants freedom. Those who love do not build armies but those who desire domination do, and history has always favoured those who prepared for war over those who didn't

The people who rule the world from behind the political scene are extremely intelligent and courageous. They also have an extreme lack of care and they see this lack of care as a strength. They are not held back by shame, remorse or conscience but free to pursue their true will for superiority and domination.

*Fear fears surprises, wants control
Love loves surprises, wants freedom*

The evolution of human societies has occurred under conditions of survival of the strongest. The cultures and institutions that generate the largest armies have throughout history eradicated the less hierarchical alternatives. The cultures and institutions that we have today, including education, government and masonry, are the results of this evolution towards hierarchical societies that enables large armies.

The kingdoms with the most skilled and knowledgeable rulers are the ones that best control their citizens and build the largest armies. The science and art of how to control people and build hierarchies is one part of the knowledge that throughout history has been hidden and practiced by masons and members of other secret societies.

Those intelligent and courageous, who lack love and care, have come together inside these secret societies to conspire for world dominance. They are naturally bound together by their shared interest in a world where humanity is not free but structured into hierarchies for them to rule.

Their nature is what makes them stronger and able to dominate and rule the world. They are intelligent, courageous, dedicated and hard working without the weakness of empathy. They celebrate this nature officially, in front of our eyes, without us knowing. Their language is symbols and numbers.

Thelema is a Greek word for will and willpower. It is used as the name of a philosophy, written by a 33rd degree mason, that claims willpower to be superior to care and love.

The essence of "Thelema" is usually summerised into two phrases called the law of "Thelema". It says:

"Do as thou wilt shall be the whole of the law."

"Love is the law. Love under will"

It does not say do as thou wilt, but bring no harm. It just sais do as you will. It is the absence of moral and love, and the right of the strong to rule the weak.

The second part says that love is under will. It says that those with a strong will are superior to those who love and care. It is a philosophy for those who somewhat accurately can be described as psychopaths.

The full meaning of "Thelema" is not yet revealed, however it will be shown that "Thelema" was the main theme of nine eleven.

Using the Greek alphabet and adding up the numerological value of the letters in Thelema we get 93 which is the number of Thelema. Using the English alphabet we get 64.

T=20 h=8 e=5 l=12 e=5 m=13 a=1 = 64

If we reduce* the date 9.11.2001 we get 9.11.3. This date symbolises the two pillars of the mind (Boaz & Jachin) or the two twin towers being brought down by 93 or Thelema.

**Reduction is used in most kinds of occult studies. Large numbers are reduced by taking the individual numbers that they consist of and adding them together. The numbers 11, 22 and 33 have meaning and are normally not reduced further*

The four flights of nine eleven were numbered 11, 77, 93 and 175. The number 77 is central to nine eleven and will be handled later.

The flights that hit the twin towers were flights 11 and 175. Add them together and we get 186 which is exactly the double of 93.

So. Two flight, numbering on average 93, carrying 137 passengers and 9-11 crew hit the twin towers.

The time of first impact was 8.46.30. This exact time was chosen for several reasons. One is that it was the first plane out of two to hit the twin towers and 46.30 is half of 93. Flight 175 then hit the south tower at 09.03.

The north tower was hit between floors 93-99 (9×11). The south tower was hit between floors 77-85.

Flight 77, carrying 64 passengers, hits the Pentagon at 9.37. Thelema, according to the English alphabet is 64. 93 is found in the time of impact.

The next broadcast will contain the final piece of the puzzle needed to understand nine eleven and what is truly going on.
